Force Operational Characteristic Unified Software (FOCUS)

SYSTEM DESCRIPTION

Force Operational Characteristic Unified Software (FOCUS) provides strategic transportation updates (based on data taken from Common Operational Modeling, Planning and Simulation Strategy, and the Army Status of Resources and Training System) to Department of Defense, Joint Staff, and Department of the Army planners. Actual Unit Movement Data (UMD) for cargo and passengers is passed to Joint Operation Planning and Execution System (JOPES) and, when necessary, to the Military Traffic Management Command.

INTEROPERABILITY CERTIFICATION STATUS

Please refer to the Joint GCCS Interoperability Status Table
